External job description
Job summary
Have you always wanted to be a part of something bigger - something that charts a course for the future? Do you love seeing the result of your work reflected in the world around you? Do you thrive on solving problems, spotting patterns and working in an ever-changing environment? Then please, read on!

Key job responsibilities
• Work with a range of text, speech and other types of data.
• Deliver high-quality labelled data, using guidelines provided to meet our KPIs, and using in-house tools and software.

• Report issues with tools and software as and when they occur.
• Show Ownership and initiative when providing feedback for improvements to existing tooling that can increase the amount and quality of the data we process - we believe every ground-breaking change starts with a small idea!
• Maintain strict confidentiality and follow all applicable Amazon policies for securing confidential information.

A day in the life
We are looking for a Data Associate (DA) to undertake the task of foundational labelling functions, such as dialogue evaluation on speech & text data, to assess and improve Alexa's performance in everyday situations.
To effectively change the world, you need to be a bit different - your adaptability, focus, and attention to detail in a constantly shifting environment are unparalleled; you pride yourself on your ability to recognize issues - and come up with elegant and innovative solutions. You will be a part of a diverse team with the shared vision to make huge strides in the world of technology and the way we use Artificial Intelligence. So, an inner drive, individuality, and a creative mind are extremely beneficial.

About the team
The Alexa Data Services (ADS) organization provides data creation, curation, and analytics services to help develop, test, and train the Alexa AI. We work closely with Amazon Machine Learning (ML) Science and modelling teams, providing the critical data they need to improve Alexa's speech recognition and language understanding capabilities.

Basic qualifications
• Bachelor's degree in a relevant field or equivalent
• Proficiency in English and Hindi grammar and spelling (both written and verbal)
• Comfortable working with speech from various dialects and accents of one or more of the following regional languages: Hindi
• Excellent computer skills, including MS Office, with good typing speed (>40 wpm and >90% accuracy) and basic troubleshooting abilities.

Interested Candidates to report in the Department of Business Administration, University of Lucknow, Old Campus at 9:30am on Saturday 30th July 2022 with a copy of their CV and University I Card
