Uranium can cause kidney damage, increase cancer risk

► Continued from P 1

Bihar's environmental conditions have compounded the issue. The state's heavy dependence on ground water for drinking and irrigation, discharge of untreated industrial effluents and long-term use of chemical fertilisers and pesticides have already led to contamination with arsenic, lead and mercury in biological samples. The detection of uranium in breast milk signals the contamination has reached the most vulnerable population — infants.

Infants are especially vulnerable to uranium because their organs are still developing, they absorb toxic metals more readily and their low body weight amplifies exposure. Uranium can cause kidney damage, neurological impairment, cognitive delays and increase the risk of cancer later in life.

Globally, elevated uranium in groundwater has been reported in Canada, the US, Finland, Sweden, Switzerland, the UK, Bangladesh, China, Korea, Mongolia, Pakistan and the Mekong delta.

But its presence in breast milk in Bihar takes the problem to a new level.

Docus point to organised racket operating with locals

► Continued from P 1

Another 24 were in Bengal — Durgapur, Purulia, Howrah, and Kolkata — covering residences, offices, illegal toll booths, and coke plants associated with Narendra Kharka, Krishna Murari Kayal, Yudhishtir Ghosh, Raj Kishore Yadav, Lokesh Singh, Chinmay Mondal, Nirad Baran Mondal, and others. According to ED, seized documents corroborate these allegations and point to an organised racket operating with local support. **TNN**
